

# EX FORTI

## IXA box

IXA box is an accent Piece that recalls Lines and Design of the Bacabs Collection, and focuses its attention on synthesizing the perfect union of two bolstriking Metal Elements.

A plate of Alpacca embraces a matryoshka structure in Noce canaletto with a glossy look, characterized by simple and linear geometry.

The visual effect of this metal gives life to a spectacular play of depths and lights, reflecting the environments in which the Piece is inserted.

Thanks to its complex chemical composition, Alpacca has a dense color positively influenced by the passage of time, exhibiting a soft sheen.

The hand-carved base has four supporting elements forged in Brass, which turns a structural element into a masterpiece of Italian craftsmanship.

Once again, the base elements evocative shapes pay tribute to the Mesoamerican Art and to the characteristic Mayan pyramids, the Ziqquarats.

The Top replicates the design solution of the Bacabs Collection, where a Brass Mesh bejeweled the top; the modernity of the Brass with its bold and precious appearance, contrasts pleasantly with the essential lines of the dark wood knob.

Thanks to its monumental appearance, IXA Box reflects the bold character of the Brand.
