

K A T A Console

Taking its name from the Maya word for “grid” or “woven”, the Kata Console embodies the core aesthetic of Ex Forti, a brand rooted in the bold forms and architectural strength of Brutalism. Entirely handcrafted in clay-lacquered wood, its monumental silhouette is refined by textured, burnished brass bands seamlessly recessed into the legs. Beneath the top, a discrete drawer—lined in rust-colored Nubuck leather and fitted with matching brass handles—offers a rich touch of tactile luxury. On either side, intricate brass grilles feature a sliding central panel, designed for effortless cleaning and stylish display storage.
