side Table

Embodying the line's distinct identity and inspired by the Maya word for “grid” or “woven”, the Kata Side Table expresses the pure essence of Ex Forti—a brand rooted in the bold forms and architectural strength of Brutalism. Meticulously handcrafted in silk-lacquered wood, its cubic monolithic form brings a compact yet powerful volume to any space. The clean geometry is dynamically broken by textured, burnished brass bands recessed asymmetrically across its edges, transforming a solid architectural block into a refined work of detail.
